15. One customer may have several mobile terminals for different uses   ① ② ③ ④ ⑤

⑤   high similarity of answers
- streaming video will not be key application (I totally agree with this opinion)
- at least 3 different customer groups (perhaps)
- 20 ms delay variation is not comprehensible (I totally agree)
- mobile terminals and PDAs will merge (I am tend to disagree)

③   some variability in the opinions (I basically have similar opinion about these issues)

① ② ③ ④ no clear common opinion
- all 5 topics indeed appear unclear, my personal view
  - 3: in the long run yes, but perhaps not within 5 years
  - 6: perhaps not (within 5 years period)
  - 9: probably not
  - 11: some terminals yes, but not majority
  - 12: games yes, but they must be strongly modified versions
